900LX™ Inversion Table

Assembly Instructions

For gravity-assisted stretching and decompression

* Specifications may vary from this image and are subject to change without notice.

To download and print Teeter's 900LX instructions, visit the product support page at teeter.com.

“...I created Teeter so people could live healthier, more active lives.”

- Roger Teeter founder & innovator
Congratulations on your purchase of a Teeter 900LX™ Inversion Table! In order to utilize this product to its fullest extent, it is critical that you follow the assembly instructions, read and fully understand the Owner’s Manual attached to the equipment, and review the Getting Started DVD prior to using your new Teeter Inversion Table.

Teeter Decompression Devices are 510(k) registered with the FDA and are multiple user, reusable medical devices for home use, intended to provide traction to the spine while stretching the para-spinal muscle and soft tissues. The devices provide non-powered traction and are meant for use by adults.

Teeter Decompression Devices are indicated for the following conditions: back pain, muscle tension, degenerative disc disease, spinal degenerative joint disease, spinal stenosis, herniated disc, spinal curvature due to tight muscles, sciatica, muscle spasm, and facet syndrome.

For step-by-step, 3D interactive instructions, download BILT (a FREE mobile app) to your smartphone to follow along. See Page 5 for instructions on how to download BILT.

To register your product warranty, go to teeter.com/Support/Warranty-Registration

If you have any questions concerning assembly or if any parts are missing, DO NOT RETURN THE ITEM TO THE STORE OR CONTACT THE RETAILER. Our dedicated customer service experts can help! Contact Teeter Customer Service at 800.847.0143, or via online forms or Live Chat at teeter.com.

Get more from your inversion sessions by downloading the TeeterLink™ app to your phone to track usage and pain levels, get reminders and customized guidance, access support, and more! Scan the code or search TeeterLink in your app store to get started!

IMPORTANT SAFETY INSTRUCTIONS
READ ALL INSTRUCTIONS BEFORE USING THE INVERSION TABLE

WARNING

FAILURE TO FOLLOW INSTRUCTIONS AND WARNINGS COULD RESULT IN SERIOUS INJURY OR DEATH.

To reduce the risk of injury:

- Read and understand all the instructions, review all other accompanying documents, and inspect the equipment before using the inversion table. It is your responsibility to familiarize yourself with the proper use of this equipment and the inherent risks of inversion if these instructions are not followed, such as falling on your head or neck, pinching, entrapment, equipment failure, or aggravating a pre-existing medical condition. It is the responsibility of the owner to ensure that all users of the product are fully informed about the proper use of the equipment and all safety precautions.

- **DO NOT** use until approved by a licensed physician. Inversion is contraindicated in any medical or health condition that may be made more severe by an elevation of blood pressure, intracranial pressure or mechanical stress of the inverted position, or that may impact your ability to operate the equipment. This may include injury or illness, but also the side effects of any drug or supplement (prescribed or over-the-counter). Specific conditions may include, but not be limited to:
  - Any condition, neurological or otherwise, which results in unexplained tingling, weakness or neuropathy, seizure, sleep disorder, lightheadedness, dizziness, disorientation, or fatigue; or impacts strength, mobility, alertness, or cognitive ability;
  - Any brain condition, such as trauma, history of intracranial bleed, history or risk of TIA or stroke, or severe headaches;
  - Any condition of the heart or circulatory system, such as high blood pressure, hypertension, increased risk of stroke, or use of anticoagulants (including high doses of aspirin);
  - Any bone, skeletal or spinal cord condition or injury, such as significant spinal curvature, acutely swollen joints, osteoporosis, fractures, dislocations, medullary pins or surgically implanted orthopedic supports;
  - Any eye, ear, nasal or balance condition, such as trauma, history of retinal detachment, glaucoma, optic hypertension, chronic sinusitis, middle or inner ear disease, motion sickness, or vertigo;
  - Any digestive or internal condition, such as severe acid reflux, hiatal or other hernia, gallbladder or kidney disease;
  - Any condition, neurological or otherwise, which results in unexplained tingling, weakness or neuropathy, seizure, sleep disorder, lightheadedness, dizziness, disorientation, or fatigue; or impacts strength, mobility, alertness, or cognitive ability;
  - Any eye, ear, nasal or balance condition, such as trauma, history of retinal detachment, glaucoma, optic hypertension, chronic sinusitis, middle or inner ear disease, motion sickness, or vertigo;
  - Any digestive or internal condition, such as severe acid reflux, hiatal or other hernia, gallbladder or kidney disease;
  - Any condition for which exercise is specifically directed, limited or prohibited by a physician, such as pregnancy, obesity, or recent surgery.

- **ALWAYS** be certain the Ankle Lock System is properly adjusted and fully engaged, and that your ankles are secure before using the equipment. HEAR, FEEL, SEE and TEST that the Ankle Lock System is snug, close-fitting and secure EVERY TIME you use the equipment.

- **ALWAYS** wear securely tied lace-up shoes with a flat sole, such as a normal tennis-style shoe.

- **DO NOT** use any footwear that could interfere with securing the Ankle Lock System, such as shoes with thick soles, boots, high-tops or any shoe that extends above the anklebone.

- **DO NOT** use the inversion table until it is adjusted properly for your height and body weight. Improper settings can cause rapid inversion or make returning upright difficult. New users, and users who are physically or mentally compromised, will require the assistance of a spotter. Make sure the equipment is set to your unique user settings prior to each use.

- **DO NOT** sit up or raise head to return upright. Instead, bend knees and slide your body to the foot-end of the inversion table to change weight distribution. If locked out in full inversion, follow the instructions for releasing from the locked position before returning upright.

- **DO NOT** use the inversion table upright if children are present. Fold and lay the table on the floor. **DO NOT** use outdoors.

- **DO NOT** drop or insert any object into any opening. Keep body parts, hair, loose clothing and jewelry clear of all moving parts.

- **DO NOT** use in any commercial, rental or institutional setting. This product is intended for indoor, home-use only.

- **DO NOT** operate equipment while under the influence of drugs, alcohol, or medication that may cause drowsiness or disorientation.

- **ALWAYS** inspect the equipment prior to use. Make sure all fasteners are secure.

- **ALWAYS** replace defective components immediately and/or keep the equipment out of use until repair.

- **ALWAYS** position equipment on a level surface and away from water or ledges that could lead to accidental immersion or falls.

- Refer to additional warning notices posted on the equipment. If a product label or Owner’s Manual should become lost, damaged or illegible, contact Customer Service for replacement.

Safety Warning Labels & Product Specifications

Important: Please review all labels and supporting materials before using your inversion table.

This drawing indicates the locations of the warning labels found on your product. If a label is missing, illegible or is removed, contact Teeter Customer Service to request a complimentary replacement label.

Note: Image and labels below not shown at actual size.

Assembled Non-Use Dimensions: 63.3 (L) x 28.8 (W) x 57.3 (H) in. (160.7 x 73.2 x 145.4 cm)
Maximum In-Use Dimensions: 81.8 (L) x 28.8 (W) x 85.0 (H) in. (207.8 x 73.2 x 215.9 cm)
Storage Dimensions: 20.0 (L) x 28.8 (W) x 66.0 (H) in. (50.8 x 73.2 x 167.6 cm)

Weight (approx.): 62.6 lb. (28.4 kg)
Unpack and Prepare Your Workspace

- If possible, set up the product at or near the space in which you intend to use it to avoid moving it later.
- Unpack all parts and support materials. Set aside packing materials and clear your work area.
- Locate the Hardware Kits, packaged with the manuals. They are labeled to correspond with the assembly process.

- The **Getting Started DVD** provides step-by-step instruction on how to assemble your product. You may find it helpful to follow along with the DVD by watching it on either your TV or computer. The DVD is divided into the following sections:
  - **Assembly** - Follow step-by-step instruction on how to assemble your inversion table.
  - **User Settings** - Personalize your inversion experience by adjusting four customizable settings.
  - **Use Instructions** - Learn how to test your balance and rotation control, and how to properly invert and return upright.
  - **Advanced Stretching & Exercises** - Use your Teeter for rotational stretches, sit ups, squats and more!
  - **BONUS Healthy Back and Body Routines**
    Get guided instruction on stretches and exercises you can do on your own to help strengthen your back and gain flexibility.

*Not available in French or Spanish.

**Making Assembly Even Easier with BILT.**

For step-by-step, 3D interactive instructions, download BILT (a FREE mobile app) to your smartphone to follow along. Simply download the BILT app by scanning the QR code below and then search for Teeter 900LX within the BILT app to get started!
Assemble A-Frame Base & Stretch Assist Handles

1. On a level surface, position the A-Frame so that it is standing upright and the Stability Feet are on the ground.

2. Gently push down on the Spreader Arms to ensure they are fully open and in the “locked” position (Figure 1).

3. Look for temporary circular assembly assistance labels on the A-Frame. RIGHT, LEFT, FRONT, and REAR indicate your position while using the equipment, not facing it. These labels can be removed easily upon completion of assembly.

4. Locate the Handle Assembly Hardware Kit (HK1008).

5. Determine the left or right handles, marked with an embossed L / R on the inside of the black plastic part of each handle.

6. Align the black plastic part of the corresponding handle (left / right) over the outside edge of the Hinge Plate on the A-Frame (Figure 2).

7. Insert and loosely hand-tighten three of the Allen Head Screws through the Hinge Plate into the handle (Figure 3).

8. Repeat with other handle. Tighten all fasteners with the Allen Wrench provided, being careful not to over-tighten.
STEP 2
Assemble Roller Hinges to Table Bed

NOTE: Some models come with Traction Handles pre-assembled to the Roller Hinges. However, the assembly instructions detailed below still apply.

- Familiarize yourself with the 3-Hole Roller Hinge and Cam Lock terms (Figure 4).

**WARNING**

NEVER disassemble the Roller Hinge Pivot Pin.
ALWAYS insert the 3-Hole Roller Hinge (with the Pivot Pin on top and facing out) in the same direction as the arrow label located inside of the Cam Lock for proper assembly.

- For ease of assembly, rest the Table Bed against the Crossbar (Figure 5) at the front of the A-Frame.

- On one side of the Table Bed, lift and hold the Cam Lock up all the way to unlock (Figure 6).

- In your other hand, hold one Roller Hinge near the Pivot Pin. With the Pivot Pin facing out (away from the Table Bed), slide the bottom of the Roller Hinge between the Cam Lock and the Bracket in the same direction as the arrow label located inside of the Cam Lock.

**TIP:** Make sure that the Cam Lock is completely open when inserting the Roller Hinge, otherwise assembly will be more difficult.

- Engage one of the holes in the Roller Hinge over the Bracket Pin. Figure 8 shows the Roller Hinge installed correctly, with the Bracket Pin engaged in Setting C.

**NOTE:** Refer to the Owner’s Manual for an explanation of the hole settings. If you are unsure, use Setting C to start.

- Push down on the Cam Lock (Figure 7) to lock it and secure the Roller Hinge.

- Repeat on other side. Make sure the Roller Hinges are in the same hole setting on both sides.
STEP 3
Assemble Table Bed to A-Frame

- Face the front of the A-Frame where the Crossbar is located (Figure 9).

- Grasp both Roller Hinges, right above the Cam Lock, and lift the Table Bed. Allow the top of the Table Bed to rotate toward the floor, so that the back of the Table Bed is now facing you and the top of the Table Bed is in front of the Crossbar (Figure 10).

- Lower each Roller Hinge Pivot Pin into the A-Frame hinge plates, one side at a time (Figure 11). The Self-Locking Hooks will open to allow the Pivot Pin into the Hinge Plate slot, then automatically snap closed over the Pivot Pin.

  **TIP:** You may need to push outward on the Hinge Plate in order for the second Pivot Pin to lock in place.

- Make sure that each Pivot Pin is seated at the base of the slot in the Hinge Plates, and that the Self-Locking Hooks have closed over both Pivot Pins (Figures 11a & 11b).

  **WARNING**
  
  Failure of the Self-Locking Hooks to close over both Roller Hinge Pivot Pins is an indication of improper assembly and if not corrected could result in serious injury or death!

- Rotate the Table Bed into the use position (Figure 12). Ensure that it rotates smoothly. See also Image A on Page 11 to ensure correct assembly.
• Your model’s Main Shaft may differ from what is shown in the figures, however the assembly instructions remain the same.

• Facing the front of the A-Frame, hold the Main Shaft in your left hand with the height markings facing up. Slide the end of the Main Shaft into the Main Shaft Housing (Figure 13), located at the base of the Table Bed.

• With your right hand, pull out the Height-Selector Locking Pin (Figure 14) to allow the Main Shaft to slide in further and release in the desired height setting. Refer to the Owner’s Manual for more information on selecting your height setting.

• The Main Shaft MUST REST against the Crossbar bumper on the A-Frame (Figure 15).

**IMPORTANT:** The Crossbar prevents the Table Bed from rotating forward when the user steps on the Ankle Comfort Dial. If the Main Shaft does not rest on the Crossbar bumper as shown in Figure 15, then the Table Bed has been assembled backwards onto the A-Frame.

This MUST BE CORRECTED before use. See also Image B on Page 11 to ensure correct assembly.

• Test the inversion table by hand for smooth and steady rotation (Figure 16) and ensure that all fasteners are secure.
STEP 5
Attach Angle Tether

- The tether will come pre-assembled to the A-Frame.

- Unfold the adjustable tether and clip it to the U-Bar on the underside of the Table Bed (Figure 17).

- Slide the buckle to lengthen or shorten the strap depending on your desired maximum angle of inversion.

![Diagram of tether attachment](image)
**Misassembly Check**

*WARNING*

If your Teeter Inversion Table looks like either of these images, your inversion table has been misassembled and is unfit for use. Improper assembly could result in serious injury or death!

---

**Image A**

Go back to Step 2 for instruction.
Demonstrates that the Roller Hinges have been assembled upside down into the Table Bed and must be corrected.

---

**Image B**

Go back to Step 3 for instruction.
Demonstrates that the Table Bed has been assembled into the A-Frame backwards so the Main Shaft is not resting on the Crossbar and must be corrected.
Before Inverting

Ensure Owner’s Manual is Attached

The Owner’s Manual contains important information on how to use your Teeter Inversion Table, including how to personalize the user settings, properly secure and release the Ankle Lock System, and test and adjust the rotation control.

- If not already attached, thread the provided metal chain through the pre-punched hole in the upper corner of the Owner’s Manual.

- Secure the chain to the A-Frame through the designated hole in the Hinge Plate (Figure 18 & 18a). Allow the Owner’s Manual to hang freely on the outside of the A-Frame Spreader Arms so it doesn’t interfere with the rotation of the Table Bed.

**IMPORTANT:** Once attached to the A-Frame, **DO NOT** remove the Owner’s Manual. It should remain permanently attached to your inversion table to serve as a reference for all users in regards to proper adjustment and use of the equipment.

**WARNING**

Read the Owner’s Manual thoroughly before using your Teeter Inversion Table. Improper settings could result in serious injury or death!

View the Remainder of the DVD

The Getting Started DVD is a helpful supplement to the Owner’s Manual, with easy-to-follow instructions on user settings, how to invert, storage and maintenance, and even stretching and exercises you can do with your Teeter.

Download TeeterLink™

Get more from your inversion sessions by downloading the TeeterLink™ app to your phone to track usage and pain levels, get reminders and customized guidance, access support, and more! Scan the code or search TeeterLink in your app store to get started!
HOW TO SUBMIT YOUR REGISTRATION:

Step 1
Fill out this information for your own records.

Step 2
Go online to teeter.com to register your warranty.

If you are unable to go online, you can request a warranty card to be mailed to you by calling Customer Service at 800-847-0143. Please DO NOT mail this to Teeter.

The Teeter warranty set forth below and on Teeter’s website applies to US and Canadian customers only. For international customers, please consult your local distributor for warranty information which will vary depending on country.
Prepare the body for movement, accelerate recovery, minimize muscular imbalances, and improve overall flexibility with the Teeter collection of textured Foam Rollers.

Better Back™ Foam Rollers

Better Back™ Vibration Cushion

Transform your Teeter Inversion Table to help revive tired, sore muscles. Features 10 vibrating massage motors, neck support with light-heat technology, and LCD remote control.

Inversion Program Mat

Enhance your inversion experience with 24 illustrated stretches and exercises right at your fingertips. Provides non-skid protection for hard floors. 36” x 60”.

P2™ Back Stretcher

Apply gentle, user-controlled traction to allow the lower back to decompress, reduce nerve pressure, and relax tense muscles.

Better Back™ Neck Restore

Provides support of the upper neck/cervical spine for self-administered suboccipital release, a technique to reduce tension in the supporting muscles.

reNEW™ Muscles Pain Relieving Cream

Deeply penetrates sore and aching muscles on contact. Specially formulated with emu oil, arnica, MSM, and glucosamine.

FreeStep™ Elliptical Recumbent Cross Trainer

Provides a new level of ease to exercising in your own home with a stress-free, zero-impact cardio and strength workout.

If you have any trouble assembling the equipment, or questions about its use, please contact customer service.
